DEFINITIONS

Columbiformes - Caged birds.
Examples are pigeons, and doves.

Combined - Total number of animals allowed must not exceed your lot size. Example: If you live in A-1, lot size one acre, and you wanted cattle and small livestock, you would have to determine your quantity limits. Small livestock are 12 per acre, and cattle are 4 per acre. You would be allowed 2 cattle and 6 small livestock. This would use up your acre allotment.

Exotics - Exotic animal means any animal belonging by nature or origin to another part of the world or any animal not normally kept as a pet or livestock animal.

Fowl - Chickens, geese and peafowl.

Small Animals - Rabbits, chinchillas, and guinea pigs.

Small Livestock - Sheep and Goats

For additional details on the City's animal regulations, please refer to the Development Code, Chapter 16.16.
