SUBJECT: Consideration of Development Code Amendment DCA12-10117 pertaining to permits and procedures; Applicant: City of Hesperia; Affected area: Citywide

RECOMMENDED ACTION

It is recommended that the Planning Commission adopt Resolution No. PC-2012-06, recommending that the City Council approve DCA12-10117, regarding permits and procedures.

BACKGROUND

This Development Code Amendment is part of staff's comprehensive update of the Development Code following adoption of the General Plan in September of 2010. Chapter 16.12 specifies the application process regulations including the appropriate reviewing authority, noticing procedures, time limitations, and approval requirements for all types of projects. Amendment to this section was suggested when two solar farms were filed in residential areas. In addition, staff is taking this opportunity to update this section based on current practices and procedures.

ISSUES/ANALYSIS

Most of this Chapter, with the exception of the California Environmental Quality Act (16.12.410) and Non-conforming uses (16.12.310) has not been revised since 1994. This Ordinance will amend this section consistent with state law as well as to streamline the entitlement procedures as follows:

- Elimination of Section 16.12.010 (A)(1)(g) (i) and (ii) as it pertains to noticing;
- Elimination of Section 16.12.015 as it pertains to Pre-application Conference;
- Elimination of Section 16.12.360 (G), (H), (I), (J), and (K) as it pertains to Temporary Dependant Housing;
- Elimination of Section 16.12.085 as it pertains to the requirement of a site plan review for residential development of two, three, or four dwelling units;
- Provides additional procedures for Alcohol Conditional Use Permits and Revised Conditional Use Permits without Planning Commission approval.

Amendment to noticing procedures

The noticing procedures have not been amended since 1994. Current procedure exceeds that required by state law. The City is required to notice properties within 300 feet, 600 feet and 900 feet based upon lot size and whether a legislative action is necessary. The reviewing authority

may also expand the surrounding property notice requirement if deemed necessary to include all properties potentially affected by an application. State law only requires that properties within 300 feet of the project boundary to be noticed.

Elimination of Pre-application Conference

The Pre-application Conference is an application that is submitted to and reviewed by the Design Review Committee (DRC). This process requires a fee but does not result in an approval. In the past this application was filed in order to generate feedback from all different departments, prior to a formal submittal. This process can be eliminated as the City currently offers applicants the opportunity to present projects as a "walk-on" prior to the submittal of a formal application. These "walk-on's" are evaluated by the DRC after all noticed projects have been considered and allows applicants to receive feedback from all departments, free of cost. Consequently, the pre-application conference application is no longer necessary.

Elimination of Temporary Dependant Housing

The Temporary Dependant Housing (TDH) regulations were adopted to allow an additional dwelling unit with a single family residence for persons over 62 years of age or anyone with a disability. There are currently no active TDH permits in the City, as the last one was issued in 1997 and expired on April 15, 2000. Because TDH's are not legally required and have not been issued in over 10 years, staff believes that their elimination will not negatively affect the housing opportunities in the City. Furthermore, the City is required by law to offer Second Dwelling Units as an additional housing unit. These are very similar in nature to a TDH with the exception that it is treated as a permanent unit that may be rented rather than a temporary unit that is limited to a dependant senior or disabled person.

Elimination of Site Plan Review requirement for residential development of two, three, or four dwelling units

The current practice has been to not require a discretionary approval for four units or less, as long as the project meets all current development standards. This amendment will codify current practice.

Amendment to CUP Revisions Section

Since adoption of the Main Street and Freeway Corridor Specific Plan (MSFCSP), staff has established policy for processing Alcoholic Beverage Control (ABC) Conditional Use Permit (CUP) applications. This applies to new or expanded alcohol uses in properties within the MSFCSP such as expanding and existing beer and wine license to a full liquor service. This amendment will codify this policy consistent with the MSFCSP. The Major and Minor CUP are also being revised consistent with current practice. Major Revisions will be processed as Revised CUP's. This application is used for conditionally permitted uses proposed at an existing facility, where the impact is not significant enough to require the submittal of a new CUP. Projects which propose changes that are not significant enough to trigger a Revised CUP will be approved administratively. A Minor CUP would require a ministerial approval through a letter of substantial conformance.

A number of minor changes were made throughout Chapter 16.12. For example, the decision making authority has been changed from building official or planning director to the reviewing authority. Section 16.12.090 has been amended to include subsection E, requiring submittal of a rendering of every project and digital copies of plans. In addition, Section 16.12.085 was re-formatted to fit within a table, providing a simpler and clearer arrangement of the information. The recommended changes to the Development Code are identified within the (Exhibit "A") of the Ordinance. Additions are shown on the resolution Exhibit "A" using red underlined text and deletions are represented by strikethroughs.

Environmental: This Development Code Amendment is exempt from the requirements of the California Environmental Quality Act (CEQA) by Section 16.12.415(B)(10) of the City's CEQA Guidelines. The proposed Ordinance does not expand the allowable uses, change intensities, or grant entitlements not already permitted.

Conclusion: This Development Code Amendment codifies policy consistent with state law and the Main Street and Freeway Corridor Specific Plan.

FISCAL IMPACT

None.

ALTERNATIVES

1. The Planning Commission may decide to retain the 600-foot and 900-foot radius notice requirements. This is not recommended, as staff has the ability to increase radius notices based on the type and level of controversy of each project.
2. The Planning Commission may choose to retain the property posting requirement or to require that the applicant prepare and post notices.
3. Provide alternative direction to staff.

A.D. ~~D.~~ When the ~~C~~ commission determines, following a public hearing on a proposed ~~zone change~~ Specific Plan Amendment, that a change to a ~~zone~~ land use classification other than the proposed classification specified in the hearing notice is desirable, the ~~C~~ commission may recommend an alternate classification. The ~~C~~ commission must determine that the recommended alternative is more appropriate for the subject property and is consistent with the ~~G~~ general ~~P~~ plan and the intent of the development code. If it is more intense than the recommended alternative, a new public hearing is required.

(Ord. 192 Exh. A (§ 83.05.040), 1994)

16.12.195 - Action by the ~~city council~~ City Council.

A. ~~A.~~ After the recommendation of the ~~planning commission~~ Planning Commission for approval on a proposed ~~zone change~~ Specific Plan Amendment, or if an appeal of a denial has been filed, the ~~city council~~ City Council shall hold at least one public hearing. 16.12.205 — ~~Prezoning~~/Pre-Designation.

VARIANCES AND MINOR EXCEPTIONS

16.12.210 — ~~Purpose~~ of provisions.

The purpose of a variance or minor exception shall be to insure that no property, because of special circumstances applicable to it, due to size, shape, topography, location, or surroundings, shall be deprived of privileges commonly enjoyed by other properties in the same vicinity and ~~zone-district~~land use designation.

(Ord. No. 2011-08, § 3(Exh. A), 8-2-11)

16.12.215 - General provisions.

~~A.~~ A.—In no case shall a variance or minor exception be granted to permit a use other than a use permitted in ~~that zone-district~~the land use designation.

~~A.B.~~ B.—Any variance or minor exception granted shall be subject to such conditions as will assure that the adjustment thereby authorized shall not constitute a grant of special privileges inconsistent

with the limitations upon other properties in the vicinity and district in which such property is situated.

(Ord. No. 2011-08, § 3(Exh. A), 8-2-11)

16.12.220 - Reviewing authority.

- A. The reviewing authority may grant minor exceptions and variances from any property development standard in the city's adopted development code, subject to the procedures set forth in this article, when it is found that the strict and literal interpretation of such provisions would deny a use of property consistent with the intent and purpose of the code and the General Plan.
- B. Review and approval for the following minor exception requests will be through the administrative review with notice procedure, pursuant to Section 16.12.005(A)(2).
 1. ~~1.~~ Fence Height. In any zone, the maximum height of any fence, wall, hedge or equivalent screening may be increased by a maximum of two feet, for not more than twenty (20) percent of the total length of said wall or other screening, where the topography of sloping sites or a difference in grade between abutting sites warrants such increase in height to maintain a level of privacy, or to maintain effectiveness of screening, provided that the increased height does not encroach into the clear sight triangle area. The requirement for an exception may be waived where the requesting party is located on the low side of said wall or other screening, and the proposal does not present visual impacts to area larger than the properties directly involved in the request.
 2. ~~2.~~ Setbacks. In any residential zone, the minimum setback may be decreased by not more than twenty (20) percent where the proposed setback area or yard is in character with the surrounding neighborhood and is not required as an essential open space or recreational amenity to the use of the site, and where such decrease will not unreasonably affect abutting sites.
 3. ~~3.~~ Lot Coverage. In any residential zone, the maximum lot coverage may be increased by not more than ten percent of the lot area, where such increases are necessary for significantly improved site planning or architectural design, creation or maintenance of views, or otherwise facilitate highly desirable features or amenities, and where such increase will not unreasonably affect abutting sites.
 4. ~~4.~~ Off-Site Parking. A maximum of twenty-five (25) percent of the required parking for a use may be located on a contiguous site, not more than three hundred (300) feet from the building entrance on the site for the use for which such parking will serve the use equally as effectively, safely and conveniently as providing such parking on the same site as the use for which it is required. For the purpose of this section, contiguous shall mean sharing a common lot line and shall not include parcels separated by a public right-of-way. The reviewing authority shall require an agreement to ensure utility, availability, and maintenance of joint use of off-site parking facilities.
 5. ~~5.~~ On-Site Parking. The reviewing authority may authorize a maximum fifteen (15) percent reduction in the required number of on-site parking requirements spaces provided when it is proven that it will not result in a traffic hazard; however, no more than four spaces shall be eliminated.
 6. ~~6.~~ Height. In any district, the reviewing authority may authorize a ten percent increase in the maximum height limitation for structures, not including signs. Such increases may be approved

where necessary to significantly improve the site plan or architectural design, and where scenic views or solar access on surrounding properties are not affected.

- ~~7.~~ **7.** Signs. In any district, the reviewing authority may authorize a twenty-five (25) percent increase in the maximum sign area, or in the height of a freestanding or monument sign, where it can be determined that such increases are needed for sign visibility, will improve the architectural design of a site, and will not result in unsafe conditions, within the site or abutting properties.
 - ~~8.~~ **8.** Accessory Buildings and Structures. In residential and agricultural ~~districts~~ designations the maximum allowable aggregate accessory building and accessory structure area may be increased in accordance with the allowable area increases outlined within Sections 16.20.395 and 16.20.405. The granting of a minor exception shall not constitute a grant of special privileges inconsistent with the limitations upon other properties in the vicinity and designation ~~district~~ in which the property is situated. In reviewing a minor exception for any area increase, the reviewing authority shall also consider special circumstances relative to the proposal such as implementation of architectural elements, increased setbacks between the structure(s) and adjacent properties, use of landscape buffers and screening devices, and other similar devices.
 - ~~9.~~ **9.** Alternative Energy Systems. The maximum height and minimum yard regulations for windmills may be adjusted pursuant to Section 16.16.063. The granting of a minor exception shall not constitute a grant of special privileges inconsistent with the limitations upon other properties in the vicinity and ~~district~~ designation in which the property is situated. In reviewing a minor exception, the reviewing authority shall balance the need for the proposed placement and additional height to increase the efficiency of the windmill with its impact potential upon the surrounding area.
 - ~~10.~~ **10.** Other Exceptions. Exceptions may be considered, where in the opinion of the reviewing authority, such exceptions may not have a cumulative effect greater than those exceptions previously listed.
- C. In calculating percentages specified in Section 16.12.220(B), rounding up of fractions shall not be permitted, and only whole numbers shall be considered.
 - D. Any request not listed in Section 16.12.220(B) shall be deemed a variance and shall be reviewed by the ~~planning commission~~ Planning Commission at a public hearing, pursuant to Section 16.12.005(A)(1). The hearing shall be set and notice given as prescribed in Section 16.12.010
 - E. ~~The planning commission~~ Planning Commission is authorized to grant variances as prescribed in accordance with the procedure in this ~~title~~ Title 16, with respect to development standards which include but are not limited to the following:

 - ~~1.~~ **1.** Fences, walls and screening, where the requested height exceeds more than twenty (20) percent of the total length of the wall or other screening, or where the requested variance presents visual impacts to an area greater than the properties directly involved;
 - ~~2.~~ **2.** Site area, width and depth;
 - ~~3.~~ **3.** Front, rear and side yards;
 - ~~4.~~ **4.** Lot c Coverage;
 - ~~5.~~ **5.** Height of structures;
 - ~~6.~~ **6.** Landscaping;
 - ~~7.~~ **7.** Usable open space;
 - ~~8.~~ **8.** Performance standards;

- 9. ~~9.~~ Parking and loading facilities;
- 10. ~~10.~~ Sign height, number and location.

~~A.B.~~ ~~B.~~ An application for a minor exception or variance shall be accompanied by a site plan showing the subject property as well as the surrounding area. The site plan shall show all existing and proposed buildings and uses, and any other data required by the ~~P~~lanning ~~D~~ivision to adequately review the application.

(Ord. No. 2011-08, § 3(Exh. A), 8-2-11)

The reviewing authority will ~~determine~~ consider the merits of the proposed minor exception or variance, and its compliance with the principles, standards, policies and goals of the ~~G~~eneral ~~P~~lan and the development code. Approval of any minor exception or variance shall be based upon the following minimum criteria, which shall also constitute the findings to be made by the approval authority in approving or denying an application:

SUBJECT: Consideration of Development Code Amendment DCA12-10133, revising Chapter 16.20 of the Hesperia Municipal Code regarding Commercial Vehicle Parking; Applicant: City of Hesperia; Affected area: Citywide

RECOMMENDED ACTION

It is recommended that the Planning Commission adopt Resolution No. PC-2012-09, recommending that the City Council approve DCA12-10133, revising Chapter 16.20 of the Hesperia Municipal Code regarding Commercial Vehicle Parking.

BACKGROUND

In 1996, after considerable input, the Development Code was amended to regulate commercial vehicle parking in residential and agricultural areas (Commercial Vehicle Parking Ordinance). Further amendment of this Ordinance occurred in 2008, adding an exception to permit commercial vehicle parking on streets in residential and agricultural zone districts when the operator's property didn't allow for parking the commercial vehicle. Parking on vacant nonresidential lots was disallowed when the Ordinance was amended again in August of 2011, but included the exception allowing commercial vehicle parking in the street within nonresidential and nonagricultural areas.

These amendments were adopted by the City Council after the Community Development Advisory Committee and the Planning Commission reviewed the Commercial Vehicle Parking Ordinance on January 23, 2008 and February 28, 2008, respectively. Over 400 persons attended these two meetings and the City Council subsequently held a special meeting on April 17, 2008 in the Hesperia High School Gymnasium, which had a similar number of attendees. From those meetings, staff drafted the final Ordinance for adoption on May 6, 2008. Since 2008, only two commercial vehicles have been permitted to park in the street. During its February 7, 2012 meeting, the City Council discussed enforcement of the Commercial Vehicle Parking Ordinance and on April 17, 2012 staff was directed to initiate an amendment to the Development Code to eliminate the provisions allowing on-street parking of commercial vehicles within residential and agricultural areas.

ISSUES/ANALYSIS

Under the current Ordinance, parking of commercial vehicles is prohibited within the public right-of-way in residential and agricultural zone districts, except under special circumstances. The City Manager (through the City Engineer) can, pursuant to Section 16.20.090(H)(3)(d) allow on-street parking.

A “parking permit” may be issued based upon the following circumstances:

- 1) Conditions make it infeasible to park the commercial vehicle on private property;
- 2) The vehicle must be able to be parked a minimum 12-feet from the centerline of the road and 100 feet from a street intersection;
- 3) Damage will not occur on existing berms or street improvements.

This provision has been sparsely used – only two permits have been issued in the past three years (one on Hercules, and one on Hackberry). Any others existing in the residential/agricultural areas are in violation of this ordinance. The recommended changes to the Development Code are identified within the (Exhibit “A”) of the Ordinance. Additions are shown on the resolution Exhibit “A” using red underlined text and deletions are represented by strikethroughs.

Staff would note that this amendment would not affect parking of commercial vehicles in the street within commercial, industrial and institutional areas. Currently, the Ordinance allows parking within nonresidential areas provided the vehicle meets generally the same distance and separation requirements noted above (and the curb is not painted red).

Environmental: Approval of the Development Code Amendment is exempt from the requirements of the California Environmental Quality Act by Section 15061(b)(3) of the CEQA Guidelines. The proposed Ordinance does not expand the allowable uses or grant entitlements not already permitted by the Development Code.

CONCLUSION

Staff supports this Development Code Amendment, as prohibiting parking of commercial vehicles within residential and agricultural streets will ensure that adequate sight-distance will be maintained.

FISCAL IMPACT

None.

ALTERNATIVE(S)

1. The Planning Commission may recommend that the special “parking permit” in streets within nonresidential and nonagricultural areas also be eliminated. Some commercial and industrial uses located on small sites with limited access may have need of street parking. Therefore, staff does not recommend this alternative.
2. Provide alternative direction to staff.
